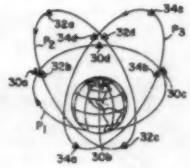
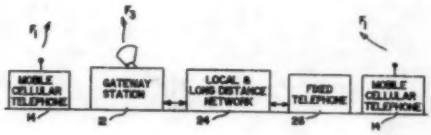
U.S. Cl. 244—158 R **33 Claims**





1. A constellation of telecommunication satellites which provides 24-hour cellular telephone communication coverage over a predetermined latitude range around the world for a cellular transceiver having an omni-directional antenna operating at a power level as low as 1/2 watt, comprising:

a plurality of less than 9 telecommunication satellites providing 24-hour cellular telephone communication coverage over a predetermined latitude range around the world which is less than whole earth coverage, each of said satellites having a plurality of multibeam antennas for enabling simultaneous bi-directional communication links with a plurality of cellular-based telecommunication devices;

each of said satellites residing in one of a plurality of predetermined orbits, with the number of said predetermined orbits being different than the number of said satellites in each of said predetermined orbits; and

each of said predetermined orbits being related to the other orbits such that each of said predetermined orbits has a predetermined inclination angle with respect to the equator, a predetermined altitude of between approximately 5600 nmi and 7500 nmi, and a predetermined ascending node spacing between satellites in different orbital planes.

37 CFR Parts 15 and 15a
[Docket No. 960722200-6200-01]
RIN 0651-XX07

Service of Process; Testimony by Employees and the Production of Documents in Legal Proceedings

Agency: Patent and Trademark Office, Commerce.
Action: Final rule.
Summary: This final rule removes parts dealing with service of process on Patent and Trademark Office (PTO) employees in their official capacity and with testimony by employees and production of documents in legal proceedings. The PTO will rely on analogous Commerce Department regulations found in title 15 of the Code of Federal Regulations.
Effective Date: August 19, 1996
For Further Information Contact: Kenneth Corsello by telephone at (703) 305-9041; by mail marked to his attention and addressed to the Office of the Solicitor, Box 8, Washington, D.C. 20231; by electronic mail to corsello@uspto.gov; or by fax marked to his attention at (703) 305-9373.
Supplementary Information: In March 1995, President Clinton issued a directive to Federal agencies regarding their responsibilities under his Regulatory Reform Initiative. This initiative is part of the National Performance Review and calls for immediate, comprehensive regulatory reform. The President directed all agencies to undertake, as part of this initiative, an exhaustive review of all of their regulations—with an emphasis on eliminating or modifying those that are osbolete or otherwise in need of reform. This final rule is part of the Regulatory Reform Initiative.

The Department of Commerce regulations dealing with service of process (15 CFR Part 15) and with employee testimony and the production of documents (15 CFR Part 15a) apply to the PTO. Therefore, the PTO is removing 37 CFR Parts 15 and 15a because they are unnecessary and duplicative.

This rule is not a significant rule for the purposes of Executive Order 12866. Notice and comment is not required for this rulemaking because it relates to agency management or personnel, 5 U.S.C. 553(a)(2), and thus no regulatory flexibility analysis is required, 5 U.S.C. 603(a). This rule does not change the paperwork burden imposed on the public. *See* 44 U.S.C. 3501 *et seq.*

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs have both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that preliminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

*A communication from the examiner should have been received in most applications filed prior to this date.

Patents will Expire as Follows:

(1) The term of any utility or plant patent that is in force on or results from an application filed before June 8, 1995 is the greater of the 20 year term provided in 35 U.S.C. 154(a)(2) or 17 years from grant subject to any terminal disclaimers. 35 U.S.C. 154(c)(1).

(2) All utility and plant patents granted on applications having an actual United States filing date on or after June 8, 1995 are granted for a term which begins on the date on which the patent is granted and ends 20 years from the date on which the application was filed in the United States. If the application contains a specific reference to an earlier application under 35 U.S.C. 120, 121 or 365(c), the patent term ends twenty years from that date on which the earliest application was filed. 35 U.S.C. 154(a)(2).

(3) All design patents are granted for a term of 14 years from the date of the grant.

However, the term of any patent may have been curtailed by disclaimer under the provisions of 35 U.S.C. 153, have lapsed due to failure to pay maintenance fees, or have been extended under the provisions of 35 U.S.C. 154, 155, or 156. Thus, if more reliable information is needed with respect to a particular patent, then the specific patent file should be reviewed to determine the actual date of patent expiration.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date.
